TEXTILE WORLD

INDEX TO VOLUME 95

JANUARY to DECEMBER, 1945

McGRAW-HILL PUBLISHING CO.
Bragdon, Lord & Nagle Division
330 West 42nd St., New York

General Alphabetical Index

A

Africa—textiles bring high prices in Mediterranean countries. W. G. Ashmore (F) ..... Dec. 119
American Assn. of Textile Chemists & Colorists Rhode Island Section meeting (F) ..... Dec. 139
American Assn. of Textile Technologists Meeting (F) ..... Oct. 141
Argentina has an active textile industry. M. T. Meadows (F) ..... Jan. 69
Atom, new source of energy (F) .... Sept. 133

B

Brazil—textile committees abroad on government missions. Gladys Montgomery (F) ..... May 141

C

China—textile mills aim at quick revival (F) ..... Nov. 147

Cotton, Raw

European textile industry compared with United States. R. C. Perkins (F). Sept. 142
Shirley analyzer aids card-waste studies. G. W. Pfeiffenberger (F) ..... Nov. 127
Tests show best cotton for a specific purpose (F) ..... Dec. 99
Trash in cotton affects grade and price. Mary A. Grimes (F) ..... Nov. 133
Washington thrashes out the cotton problem. Gladys Montgomery (F). Jan. 111

Cotton Manufacturing

Abrasion testing machine ..... June 152
After-treatment with glauber salts. Apr. 186
Agencies strive to drop 1945 garment prices to 1943 level. Gladys Montgomery (F) ..... Feb. 109
Argentina has an active textile industry. M. T. Meadows (F) ..... Jan. 69
Army and Navy extend their joint textile buying (F) ..... Oct. 125
Army need is urgent for additional 9-oz. sateen (F) ..... Feb. 129
Army textiles are unsuitable, say QM officers. Gladys Montgomery (F). Nov. 155
Automobile designer looks at textiles. Morris Sanders (F) ..... Feb. 149
Bemis Labor-Management Committee gets results. H. B. Bergfeld (F). Apr. 220
Bicarbonate process used for caustic removal. Huntress & Dubeau (F). Feb. 153
Bleaching raw, low-grade cotton. July 170
Brass fork serves double purpose on slasher ..... Jan. 130
British government moves to control textile industry. A. W. Williams (F). Nov. 149
California cotton mill seen feasible (F) ..... Aug. 92
Canadian mill man corrects weaving defects ..... Oct. 166
Card speeds increased production in tests at North Carolina State School of Textiles. Grover & Dunlap (F) ..... July 100
Carded yarn mills improved drawing. C. M. Bowden (F) pt. 3 ..... Sept. 161
Carding cotton on woolen system ... May 172
Carding proposal would increase neps ..... Sept. 198
Carding questions answered by Georgia mill men (F) ..... Aug. 109
Card-room control begins with staple selection. H. E. Helliwell (F) ..... Apr. 118
Change in stud permits use of longer brake band ..... June 164
Checking regain in cotton yarn ..... Feb. 198
Chinese and Japanese textile mills aim at quick revival (F) ..... Nov. 147
Cleaners and oilers can be assigned schedules. Gunther & Gross (F). June 135
Cloth expander, ball-bearing ..... Apr. 152
Cloth room is modernized (F) ..... Feb. 125
Compressed air removes bad roving from bobbin ..... July 142
Continuous washer cleans printing blanket ..... Sept. 177
Control indirect labor in spinning. J. H. Witherspoon (F) ..... May 116
Correct depreciation rates will help post-war success. Fred Merish (F) ... July 121
Cot designed to eliminate eyebrowing ..... May 144
Cotton and wool knitting yarn costs. P. M. Thomas (F) ..... Nov. 108
Cotton combining quality and cost. Helliwell & Ball (F) ..... June 129
Cotton Exchange marks 75 years of service. W. B. Dall (F) ..... July 91
Cotton properties evaluated (F) ..... May 123
Cotton reported with extremely high strength ..... Apr. 172
Cotton spinners—look to fundamentals. H. L. Pratt (F) ..... Apr. 111
Covering keeps woven cloth clean .. June 162
Cramerton announces automatic comber. C. M. Bowden (F) ..... July 96
Device simplifies moving bolster rail ..... June 158
Different-grade cottons blended in opener room ..... Dec. 172
Direction of unwinding modifies twist Dec. 154
Distribution of fibers called key to good yarn ..... Apr. 170
Dobby cotton looms may use rayon filling ..... Oct. 179
Dobby-jack lifter aids girl weavers. Aug. 144
Doffer's load lightened by bobbin lifter (F) ..... Oct. 143
Doffing and handling saves money. Aug. 148
Doubler-twister ..... Aug. 135
Dropped-harness defects prevented by attachment ..... Jan. 132
Drying controlled by detector ..... Nov. 160
Duck production increased at Beaumont Mfg. by attacking the manpower problem. T. O. Ott, Jr. (F) ..... Jan. 72
Duck-yarn twister production. H. I. Pratt (F) ..... June 106
Elastic cotton gauze (F) ..... Aug. 131
Electric strain-gage promises solution to textile machine problems. V. E. Hillman (F) ..... Oct. 104
Electronics at work for textiles. H. E. Reed (F) ..... July 83
European textile industry compared with United States. R. C. Perkins (F). Sept. 142
Evaporative cooling system installed at Utica. Earle Mauldin (F) ..... Dec. 117
Extra warp ends wound on take-up spools ..... Dec. 152
Extractor doubles drying production. Oct. 145
Fabric laminates—growing outlet for textiles. H. E. Reed (F) ..... Oct. 107
Fabric spreader ..... Aug. 136
Fiber inserts increase life of picker sticks ..... Feb. 178
Fiber regain data simplified. C. H. Reumann (F) ..... June 101
Filling-wound yarn not suitable for spooling ..... Oct. 176
Fine aralac fibers aid blending with cotton. C. M. Bowden (F) ..... Oct. 137
Finishing velveteen ..... Jan. 158
Fixing filling winders shown by photographs. Alfred King (F) ..... June 113
Flame singers of modern type are more economical. C. W. French (F) ... Nov. 139
Forms push cots on spinning rollers. May 156
Formulas desired for cloth calculations Nov. 196
Formulas given for estimating yarn strength ..... Dec. 164
Frame stops loom when harness breaks May 150
Frame used for painting bobbins ... July 146
Gadgeteers menace spinning production Nov. 182
Gage for setting bat-wing type shoe Mar. 144
Gage tests trueness of loom-beam gudgeons ..... Feb. 178
Gasket stops dripping oil from loom clutch ..... July 144
Georgia mill men's spinning problems (F) ..... Sept. 169
German textiles relied heavily on synthetics (F) ..... Oct. 139
Grinding nappers ..... Jan. 157
Harness adjustment for entering frame May 154
Harness motion for looms ..... July 133
Harness tool to replace eyes on loom Mar. 146
Hook used for holding bell weight. June 164
Hydraulic machine separates cylinder section ..... June 156
Industry plans to renovate, modernize and expand. H. E. Reed (F) ..... Nov. 103
Interrelation of ring, bobbin and spindle speed studied. Sheldon & Blake (F) Jan. 107
Leather strap keeps box pins in place June 160
Leno war-weaves easily reconverted to shirtings. Thomas Nelson (F) .... Apr. 137
Levers lace fabric ..... Feb. 203
Lint-free warp stop motion ..... Mar. 133
Load-elongation recorded by new device. H. C. Brown (F) ..... June 123
Long draft simplifies yarn organization. C. M. Bowden (F) pt. 1 ..... July 92
Loom attachments ..... Apr. 151
Loom binder tool ..... Nov. 166
Loom, bobbinless-shuttle ..... Oct. 148
Loom drives changed to utilize multiple V-belts. W. L. Fluke (F) ..... May 148
Loomfixers' manual. Ivar Moberg (F) Jan. 190
Loomfixer's tools—weapons of production (F) ..... Jan. 74; Feb. 122; June 110
Loom magazine tools make adjustments easy ..... June 158
Machine-picked cotton shows steady improvement. E. H. Helliwell (F). July 123
Magnifier set, portable ..... Apr. 206
Materials handling is vital in all departments. H. E. Reed (F) ..... May 97
Mechanical handling of loom beams at Nashua. Benjamin Thomas Jr. (F) Sept. 167
Mechanical properties of wool felt are controllable. W. H. Lehmberg (F) Mar. 90
Mending bag seconds made easier by holder ..... Dec. 150
Metallic card clothing. H. B. Robinson (F) ..... Oct. 102
Microscope—increasingly useful. C. W. Bendigo (F) ..... July 97
Mildew-proofing thread with solvent solutions. M. C. Brock (F) ..... Apr. 141
Mill organizations vary for coarse carded yarns. C. M. Bowden (F) pt. 2. Aug. 100
Mill technology advanced by STA meetings (F) ..... Dec. 131
Mills should know their indirect costs ..... Sept. 196
Minor weaving defects look like neps on cloth ..... Sept. 218
Modernization at American Yarn & Processing Co. C. M. Bowden (F) ..... Dec. 106
Moisture detector ..... Feb. 170
More enzymes used now than in peacetime ..... Aug. 168
Movies and slide films speed textile training. L. S. Metcalfe (F) ..... Apr. 147
Napping needs a measure of performance. L. C. Tolleson (F) ..... Dec. 127
Nashua program aids returning veterans. Swallow, Barnes & Willard (F). July 102
Netting used by the Army finished with cellulose derivatives. Capt. J. E. Goodavage (F) ..... May 139
New conceptions change many textile technics. C. W. Bendigo (F) ..... Feb. 110
New equipment development continues. H. E. Reed (F) ..... Feb. 111
No coasting for textiles on the road to V-J day! Gladys Montgomery (F) June 91
Novelty cotton designs. T. R. Hart. (F) ..... Oct. 119
100 years of chain control for loom box motions. C. W. Bendigo (F) ..... Aug. 87
Opening and carding must be better than ever. Frank Sears (F) ..... Mar. 119
Operating a finishing-plant machine shop (F) ..... Mar. 106
Organization for printing cottons. Aug. 166
Our cotton industry looks good to England. A. W. Williams (F) ..... Jan. 83
Padder-mangle, heavy duty ..... June 150
Pad-steam dyeing reaches volume production. C. N. Rabold (F) ..... Jan. 80
Pattern chains built with the help of adjustable jig ..... Aug. 142
Penetration affects depth of shade (F) Dec. 139
Pepperell greets the returning veteran. H. S. Knowlton (F) ..... Jan. 103
Picker rod bushing compensates for wear ..... Apr. 162
Planned production keeps Callaway deliveries on schedule. G. H. Williams. (F) ..... June 109
Plastic agents to stiffen gabardines. July 170
Plastic using cotton duck as a basis. May 143
Plate welded to holder protects picker stick ..... Sept. 184
Polarized light preferred for maturity tests. Mary Anna Grimes (F) .... Feb. 161
Precision winding depends on wind, lay, and gain. R. C. Pillsbury (F) ..... May 137
Predetermining fabric strength .... June 182
Processes for finishing gray goods. Sept. 208
Quiller performance improved by removing tip ..... Feb. 176
Reconversion technical problems not severe (F) ..... June 95
Reed life determined by specifications and care. H. Mochrie (F) ..... July 127
Reed plan for cotton fabric ..... May 180
Repellent finishes to be durable require careful control. R. A. Pingree (F) Feb. 131
Research sole hope for cotton's survival, C.T.I. is told (F) ..... Dec. 115
Resins on textiles improve even good fabrics. Dr. J. E. Lynn (F) ..... Mar. 99
Retarded spindle used to unwind yarns Sept. 212
Revolving clearer improves efficiency. C. M. Bowden (F) ..... June 14
Revolving spinning ring ..... Jan. 14
Revolving spinning ring alters resistance factors ..... Mar. 15
Dan River reports on research progress (F) ..... Apr. 12

(F) indicates feature article (ed) editorials

Roller selvage beams insure uniform tension ..... Jan. 134
Salvaging patterns can reduce entering costs. H. E. Wenrich (F) ..... June 141
Sapphire guides for textile machinery ..... May 144
Scale with wide range ..... Feb. 170
Schedule spinning room maintenance. H. L. Pratt (F) ..... Mar. 109
Seam detector uses electronic relay. R. J. Martini (F) ..... Oct. 135
Selvage defects may be caused by improper tension. H. E. Wenrich (F) ..... Jan. 86
Shipper handles aid draw frame tender ..... June 158
Shirley analyzer aids card-waste studies. G. W. Pfeiffenberger (F) ..... Nov. 127
Shuttle-spindle tools can be improved upon ..... Aug. 144
Single twist—facts and fallacies. T. O. Ott, Jr. (F) ..... Jan. 79
Single yarn untwists when tied to ply yarn ..... Aug. 164
Sizing of yarns ..... Mar. 170
Sloughed-off filling aided by firm bobbin ..... Dec. 146
Soldiers assigned to help mills make duck. Earle Mauldin (F) ..... Mar. 102
Sorting tray for quills ..... Nov. 170
Specialized dryers replace older equipment. C. N. Rabold (F) ..... Feb. 113
Spinning room bottlenecks should be eliminated. Gunther & Gross (F) ..... Feb. 141
Spools for heavy duty have plastic ends ..... Oct. 146
Spring stops jumping of slasher roll lever ..... Feb. 182
Steam processing has many advantages ..... Oct. 174
Steam processing scours cotton continuously. P. J. Ariente (F) ..... July 94
Stockroom control should pay for itself. Gunther & Gross (F) ..... Apr. 143
Stop motion for cotton cards ..... May 143
Strap assists lifting loom let-off lever ..... May 154
Strap fastening for picker stick ..... Oct. 158
Strength and appearance of cotton attributable to the cotton comber. Hellwell & Ball (F) ..... May 112
Struggle for production could not conquer handicaps. W. B. Dall (F) ..... Feb. 103
Sulzer loom ..... Nov. 160
Sunlamp eliminates scorch marks on fabrics ..... Sept. 190
Surplus textile release bogs down at critical time. Gladys Montgomery (F) ..... Dec. 137
Synthetic resins for book bindings. R. A. Borton (F) ..... Aug. 104
Ten years of cotton textiles (table) ..... July 119
Tension and density control ..... Dec. 141
Tension guards prevent warp ends from breaking ..... July 146
Tension in slashing controlled electrically. R. B. Moore (F) ..... Aug. 115
Termination routine on war contracts (F) ..... June 99
Tests show best cotton for a specific purpose (G) ..... Dec. 99
Textile tape for electrical conductor (F) ..... July 95
Thimbles assist in covering rolls. E. Bentley ..... Feb. 176
Tire-cord production increased by controlled atmosphere. W. E. Vecsey (F) ..... Aug. 123
Tire-cord strength determined by fiber properties. Webb & Richardson (F) ..... Aug. 121
Tire-cord values compared by tension vibrator. Dr. L. Larrick (F) ..... May 107
Trailers and nursery relieve manpower problem (F) ..... May 114
Tramp iron removed by air-duct magnet ..... Sept. 177
Trash in cotton affects grade and price. Mary A. Grimes (F) ..... Nov. 133
Tray prevents dirt from falling on warp ..... Apr. 164
Tricot machine built for high speed ..... June 151
Truck simplifies handling picker laps ..... Aug. 146
Twister room operation. H. L. Pratt (F) ..... July 113
Two truss rods steady lay and reed. F. A. Kidd ..... Mar. 140
U. S. Textile Committees abroad on government missions. Gladys Montgomery (F) ..... May 141
Velvet board makes nep-counting easy ..... July 144
Wage fixing by Congress opposed by A.C.M.A. (F) ..... Nov. 137
WPB channels goods to low-price products (F) ..... Mar. 131
WPB explains need for M-388. Gladys Montgomery (F) ..... Apr. 149
Waste control saves card-room dollars. Seth Carter (F) ..... Sept. 147
Water-tight fabrics made by swelling cotton fibers. Goldthwait & Smith (F) ..... July 105
Weave rooms need specialized supervision ..... Oct. 164
Weave-room seconds controlled by systematic check-ups. H. I. Jackson (F) ..... Dec. 102
Weaving defects caused by idle harness sheaves ..... July 140
Weaving leno fabrics ..... Nov. 194
Weaving spun rayon requires watching of loom settings (F) ..... Mar. 123
Whiproll gage makes adjustments accurate ..... July 140
Yarn scanner measures diameter variations (F) ..... June 139
Cotton Textile Institute meeting (F) .. Dec. 115

D

Defects

Damaged knitted cloth ..... May 172
Dropped-harness defects prevented by attachment ..... Jan. 132
Idle harness sheaves caused weaving defects ..... July 140
Minor weaving defects look like neps on cloth ..... Sept. 218
Selvage defects may be caused by improper tension. H. E. Wenrich (F) ..... Jan. 86
Sunlamp eliminates scorch marks on fabrics ..... Sept. 190
Throwing defects in hosiery. Dr. E. C. Dreby (F) ..... Jan. 88
Warp streaks in rayon satin ..... Jan. 160
Woolen fabric defects. Fred Sykes (F) ..... Jan. 115
Worsted-yarn defects traced by movies. F. E. Cleyn (F) ..... Sept. 171

Designing

Automobile designer looks at textiles. Morris Sanders (F) ..... Feb. 149
Design holder for patterns ..... Oct. 156
Granite and crepe weave designs. George Wakefield (F) ..... Apr. 116
Leno war-weaves easily reconverted to shirtings. Thomas Nelson (F) .... Apr. 137
Novelty cotton design. T. R. Hart (F) ..... Oct. 118
Reed plan for cotton fabric ..... May 180

Dyeing and Finishing

After-treatment with glauber salts .. Apr. 186
Analyzing finished fabrics ..... Apr. 182
Automobile designers looks at textiles. Morris Sanders (F) ..... Feb. 149
Blanket warmth is effected by construction, fiber, finish. F. T. Mosedale (F) ..... Jan. 97
Bleaching raw, low-grade cotton .. July 170
Blotch printing spun rayon with vats. T. N. Patrick (F) ..... Nov. 118
Burling-nipper point protected by cork stopper ..... Oct. 158
Color matching lamp ..... Oct. 145
Continuous washer cleans printing blanket ..... Sept. 177
Cotton shrinkproofing process will be handled by board of trustees (F) .. June 143
De-ionized water reduces variables. S. F. Alling (F) ..... Mar. 121
Dyeing techniques can minimize gas-fading of acetate. N. D. Lobar (F) ..... Oct. 133
Elastic cotton gauze produced by chemical treatment (F) ..... Aug. 131
Enzymes in printing improve blotch patterns. T. N. Patrick (F) ..... June 145
Finishing velveteen ..... Jan. 158
Gas-fading of acetate can be minimized. N. D. Lobar (F) ..... Aug. 94
Gum for sizing is starch derivative .. Mar. 156
Homogenizer ..... Nov. 159
Information requested on salts used before 1930 ..... Jan. 148
Knit goods damaged by chlorine bleach. ..... Dec. 176
Long-distance visibility from fabrics with daytime glow. J. M. Johnston (F) ..... May 110
Microscope—increasingly useful. C. W. Bendigo (F) ..... July 97
More enzymes used now than in peacetime ..... Aug. 168
Netting used by the Army finished with cellulose derivatives. Capt. J. E. Goodavage (F) ..... May 139
New chemicals available to the buyer. C. N. Rabold (F) ..... Feb. 114
Operating a finishing-plant machine shop (F) ..... Mar. 106
Organization for printing cottons .. Aug. 164
Package-dyed cloth achieved by British (E) ..... Oct. 141
Padder-mangle, heavy duty ..... June 154
Pad-steam dyeing reaches volume production. C. N. Rabold (F) ..... Jan. 84
Paper-yarn material lacquer coated .. Nov. 193
Patents show possibility of light-printing on cloth. L. C. Reynolds (F) ..... Apr. 133
Penetration affects depth of shade (F) ..... Dec. 139
Permanent finishes for rayon ..... Sept. 212
Plastic coating machines and technics. J. B. Cleaveland (F) ..... June 117
Plastics provide bond for applying pigment colors. W. W. Chase (F) .. Mar. 98
Repellent finishes to be durable requires careful control. R. A. Pingree (F) ..... Feb. 131
Resin finishes for flax fabrics ..... May 178
Resins on textiles improve even good fabrics. Dr. J. E. Lynn (F) ..... Mar. 99
Resist stains in cotton finishing .... May 176
Dan River reports on research progress (F) ..... Apr. 129
Rugs—fast colors for rugs. L. L. Walmsley (F) ..... Nov. 111
Shrink-proofing wool hose with chlorination formula. W. M. Rush (F) .. June 115
Soldier wants to develop screen-printing patent ..... Jan. 146
Solvent solutions best for mildew-proofing thread. M. C. Brock (F) .... Apr. 141
Soy-bean size is easy to apply and remove. I. G. Sanford (F) ..... Oct. 127
Spectrophotometer permits accurate color measurements. Harrison Johnston (F) ..... May 127
Sportswear finishing ..... Sept. 214
Standardized color card of Home Furnishings Branch (F) ..... Dec. 121
Synthetic resins for book bindings. R. A. Borton (F) ..... Aug. 104
Technics developed for dyeing synthetics. A. W. Etchells (F) ..... Jan. 91
Three processes given for finishing gray goods ..... Sept. 208
Washing machine used for extracting ..... July 134
Water-tight fabrics made by swelling cotton fibers. Goldthwait & Smith (F) ..... July 105

E

Europe—textiles bring high prices in Mediterranean countries. W. G. Ashmore (F) ..... Dec. 119
Exports of textile machinery (table) . Sept. 175

F

Fibers

Alginate fibers compared. C. K. Tseng (F) ..... Dec. 113
Alginate fibers made from seaweed. P. Ripley (F) ..... Dec. 112
Aralac fibers aid blending with cotton. C. M. Bowden (F) ..... Oct. 137
Ardil, peanut-protein fiber (F) ..... May 103
Army textiles are unsuitable, say QM officers. Gladys Montgomery (F) . Nov. 155
Automobile designer looks at textiles. Morris Sanders (F) ..... Feb. 149
Chicken-feather keratin fiber (F) .. May 103
Fabric laminates—growing outlet for textiles. H. E. Reed (F) ..... Oct. 107
Fiber regain data simplified. C. H. Reumann (F) ..... June 101
Fiberglas—fabric laminates. H. E. Reed (F) ..... Oct. 107
Fiberglas used to make structural materials. John Reeves (F) ..... Oct. 110
German textiles relied heavily on synthetics (F) ..... Oct. 139
Keratin proteins yield better synthetic fibers (F) ..... Aug. 99
Legislation speeds study of textile fire hazards (F) ..... Apr. 145
"Manufactured fibers" claimed suitable name ..... Mar. 156
Mechanical properties of wool felt are controllable. W. H. Lehmberg (F) ..... Mar. 90
Microscope—increasing useful. C. W. Bendigo (F) ..... July 97
New protein fibers made from many materials (F) ..... May 103
Properties of synthetic fibers (chart) (F) ..... Sept. 117
Ramie—tantalized textile men for one hundred years. W. B. Dall (F) .. Dec. 93
Technics developed for dyeing synthetics. A. W. Etchells (F) ..... Jan. 91
Velon, multi-filament fiber (F) ..... Nov. 117

Fire protection

Carbon dioxide is suitable agent to fight textile fires. F. B. Allen (F) .... Dec. 104
Fire extinguishers—portable fire extinguishers ..... Nov. 164
Legislation speeds study of textile fire hazards (F) ..... Apr. 145
France—plans for textile France pattern for liberated areas. Gladys Montgomery (F) ..... Mar. 127

G

Germany—textile industry relied heavily on synthetics (F) ..... Oct. 139

Great Britain

Britain tells its textile industry to thrive, or else— ..... Sept. 115
Government moves to control textile industry. A. W. Williams (F) .... Nov. 149
Our cotton industry looks good to England. A. W. Williams (F) ..... Jan. 82
Our spun-rayon industry also looks good to British. L. H. Horn (F) ..... Sept. 141
Package-dyed cloth achieved (F) .. Oct. 141

H

Hosiery

Air conditioning in the boarding room. J. W. Hughes (F) ..... Nov. 131
Apprentice training program developed by knitting mill. Ray Torgersen (F) ..... Nov. 141
Chadbourn Hosiery Mills convert to nylon. C. M. Bowden (F) ..... Oct. 113

(F) indicates feature article (ed) editorials

78771

Distorted loops avoided by knitting machine adjustment. J. W. Hughes (F) Dec. 123
Eye tests by the Orto-Rater improve efficiency at Magnet Mills. G. L. Weibel (F) ....Aug. 125
Fixing hosiery machines—full fashioned machines. W. A. Simond (F) Jan. 193 Feb. 167
Flat-bed hosiery machines being improved (F) ....July 105
Full-fashioned problems multiply. M. C. Miller (F) ....Apr. 106
Knitting operators aided by industrial glasses. H. E. Reed (F)....Sept. 151
Latent throwing defects show up in hosiery. Dr. E. C. Dreby (F)....Jan. 88
Link counter aids pattern builder...Nov. 168
Men, management, materials, machines and mistakes influence hosiery production. J. A. Cromley (F)....Dec. 135
National Assn. of Hosiery Mfrs. meeting (F) ....May 208
1945 believed centennial of American circular knitting. W. B. Dall (F).Apr. 104
No-seam nylons require a high standard (F) ....May 133
Nylon hose preboarded at rate of 432 per hour ....Nov. 160
Postwar Planning Committee foresees good years after the war (F)....Jan. 119
Preboarding machine ....Feb. 169; Nov. 159
Seamless hose faces transition. J. W. Hughes (F) ....Apr. 105
Sewing departments started for lace hosiery. I. G. Sanford (F)....June 133
Shrink-proofing wool hose with chlorination formula. W. M. Rush (F)...June 115
Southern hosiery mill studies management problems. Earle Mauldin (F) Aug. 106
Throwing hosiery yarns....June 192

J

Japan looks to textiles for reparations (F) Nov. 147

K

Knit goods
Air conditioning and humidity in knitting plants. H. E. Reed (F)....Apr. 111
Chlorine bleach damages knit goods Dec. 176
Circular-knit outerwear has bright future. Edward Grossman (F)....Apr. 107
Combination knitting is versatile. Raymond Kretser (F)....Apr. 108
Damaged knitted cloth....May 172
Formula for knitting production..Sept. 211
Good knitting fixing calls for preventive steps (F) ....June 121
Historical sequence of knitting developments ....June 170
Knit cloth removed by power machine Apr. 160
Knit jersey material causes handling problems ....Nov. 193
Knitted pile fabric....Feb. 200
Lighting improvements in your knitting mill. Mauldin & Reed (F)....Apr. 109
Machine measures knitting factor of synthetic yarns. Rossiter & Robinson (F) ....Mar. 100
Magnet picks up small knitting parts Aug. 146
Marratti machine no longer available Sept. 216
1945 believed centennial of American circular knitting. W. B. Dall (F).Apr. 104
Operators in knitting industry aided by industrial glasses. H. E. Reed (F) Sept. 151
Shrink proofing process to be handled by board of trustees (F)....June 143
Sportswear finishing ....Sept. 214
Stripe helps knitter watch his yarn supply ....Dec. 150
Tricot stimulates interest in knitting processes. Otto Engelhard (F)...Feb. 155
Tricot warp knitting machine....Sept. 178
Underwear expects only gradual changes postwar (F) ....Apr. 107
Variety of machines can do warp knitting. Otto Englehard (F)....Mar. 129
Warp knitting can be done on a variety of machines. Otto Engelhard (F).Mar. 129
Warp-knitting machine ....Sept. 177
Warp knitting reaches turning point. T. H. Johnson (F)....Apr. 108
Worsted knit cloth needs dimensional stability (F) ....Sept. 165

L

Linen—resin finishes for flax fabrics..May 178 May 178
Loomfixers' manual
Cotton section. Ivar Moberg (F)....Jan. 190
Wool section. E. P. Schremp (F)..Apr. 212
Loomfixer's tools—weapons of production (F) Jan. 74; Feb. 122....June 110

M

Maintenance
Air-conditioning units need frequent cleaning ....July 138
Air gun for cleaning....July 204
Air traps, installation and maintenance Apr. 156
Bearings—keep 'em running. C. G. Price (F) ....Apr. 120
Belt wiper for card made from tire tread ....Jan. 32
Brush for cleaning fluorescent-light units ....Apr. 162
Cable cutter made from hacksaw blade July 144
Can a small mill employ specialized maintenance? ....Jan. 144
Clamp holds stick while holes are bored Oct. 152
Cleaners and oilers can be assigned schedules. Gunther & Gross (F).June 135
Cleaning brush for shuttle....May 152
Cleaning floors in mills....Feb. 172
Damaged box rails salvaged with screw Aug. 148
Device cuts glaze on grinding wheel Feb. 180
Drill rack ....Sept. 184
Drill and wire used for cleaning oil pipes ....Dec. 154
Drop wire electrodes separated....Feb. 178
Electrical insulation needs close attention ....Aug. 140
Fire extinguishers must have attention Sept. 182
Gage for bevel and miter gears..Mar. 142
Glass block reduces mill-maintenance problems. J. W. Taylor (F)....July 117
Glaze removed from drive gear....June 162
Grind base of spindle if screw is too short ....Jan. 136
Hangers of leather for heavy tools..Oct. 156
Harness sheaves oiled while still on loom Aug. 146
Holder for stone aids reed polishing.Dec. 152
Holder made for tools most frequently used ....May 152
Hook on wire clears stopped-up oil holes May 156
Industry plans to renovate, modernize and expand. H. E. Reed (F)....Nov. 103
Lubrication rules should be emphasized Nov. 164
Metal scraper on broom helps the mill sweeper ....Mar. 146
Metallizing hints ....Jan. 126
Oil from drip pan absorbed by felt. E. Bentley ....Dec. 148
Oiler, drop-feed ....June 154
Oilless bearings aid machine maintenance. C. M. Bowden (F)....Sept. 159
Operating a finishing-plant machine shop (F) ....Mar. 106
Picker sticks ground with "home-made" abraser ....Sept. 188
Rasp and file cleaner made from card clothing ....Feb. 182
Reconditioned Franklin-Process springs May 144
Safety in cleaning organic solvent tanks Feb. 172
Salvaging broken harness-mount wires Apr. 164
Schedule spinning room maintenance. H. L. Pratt (F)....Mar. 109
Screwdriver, a kit for tools....Nov. 160
Should these spinning rings be discarded? ....Apr. 190
Small mill can employ specialized maintenance ....Feb. 192
Small parts container made from solenoid caps ....Apr. 164
Special crew suggested for keeping mill clean ....Mar. 154
Spindles can be oiled without oil overflow ....June 156
Splicing cotton belt technic is developed Mar. 140
Systematized cleaning saves electrical equipment. D. L. Gibson (F)....Oct. 116
Testing lamp starters....Mar. 136
Tubes, collapsible, aid loom lubrication Oct. 154
Vise stands protect smooth surfaces..Oct. 156
Warper creel repair....Jan. 136
Washer, check-strap ....May 204
Welding guard of angle box strapping Nov. 170
Window condensation stopped for paint job ....Nov. 168

Management
Bemis Labor-Management Committee gets results. H. B. Bergfeld (F)..Apr. 220
Bigelow-Sanford has unique organization which handles problems and suggestions. A. J. Green (F)....Apr. 101
Integrity is basic for successful supervisor. H. E. Helliwell (F)....Feb. 137
Key employees developed by conference method. Loui Greet (F)....May 135
Southern hosiery mill studies management problems. Earle Mauldin (F) Aug. 106

Merchandising
Standardized color card of Home Furnishing Branch (F)....Dec. 121
Textiles bring high prices in Mediterranean countries. W. G. Ashmore (F) Dec. 119

Mill engineering
Air conditioner, wall-type....July 136
Air conditioning in the boarding room. J. W. Hughes (F)....Nov. 131
Air conditioning and humidity in knitting plants. H. E. Reed (F)....Apr. 111
Air heater, recirculating....Apr. 154
Air traps, installation and maintenance Apr. 156
Automatic load control....Nov. 162
Bale rack ....Jan. 132
Bearings—keep 'em running. C. G. Price (F) ....Apr. 120
Bearing, pillow block....Mar. 134
Belt shipper for overhead drive....Oct. 154
Boiler control panel....Apr. 154
Circuit breaker ....July 136
Color dynamics in machine shop. T. O. Ott, Jr. (F)....May 119
Compensator rod prevents knock-offs Apr. 158
Compensator synchronizes motor speeds Oct. 146
Compressed-air separator, self-draining Mar. 134
Control checks liquid mixtures....Mar. 136
Controlled atmosphere ups tire-cord production. W. E. Vecsey (F)....Aug. 123
Conveyor, belt, uses portable units..Nov. 159
Danger involved in emptying drums with air ....June 178
De-ionized water reduces variables—cuts costs. S. F. Alling (F)....Mar. 121
Device tests warp stop-motion fuse..Oct. 154
Dielectric heating requirements (F) Nov. 151
Drift punch made from knock-off lever Dec. 152
Drum-opening tool ....Dec. 142
Dust remover ....Oct. 148
Electric car puller....Mar. 135
Electrical insulation needs close attention ....Aug. 140
Electronic relay detects thick seams. R. J. De Martini (F)....Oct. 135
Electronics at work for textiles. H. E. Reed (F) ....July 83
Evaporative cooling system installed at Utica. Earle Mauldin (F)....Dec. 117
Extended oil pipes speed oiling of bearings ....Dec. 152
Filtering unit, twin....Oct. 146
Fire extinguisher ....June 151
Fluorescent lamps ....Sept. 178
Fluorescent lamp life calculated. R. R. Wylie (F) ....Nov. 122
Four freedoms for motors....Feb. 174
Gas turbine ....Mar. 133
Glass block reduces mill-maintenance problems. J. W. Taylor (F)....July 117
Hot-water heater, noiseless....June 152
Humidifier, cluster type....Apr. 154
Humidifier head test. C. K. Cobb..Nov. 166
Humidifiers kept in condition in cotton mills. H. L. Pratt (F)....Apr. 111
Humidifiers, steam-type ....Dec. 142
Hydraulic lift on truck tailgate....Feb. 170
Hydraulic lift truck....July 204
Improvement possibilities continue for the engineer. Earle Mauldin (F).Feb. 117
Industrial truck with swivel fork...Mar. 136
Industry plans to renovate, modernize, and expand. H. E. Reed (F)....Nov. 103
Infra-red dryer ....May 143
Infra-red lamps for changing temperature ....July 204
Instrument records machine running-time ....Sept. 178
Lamp fixture hanger....Mar. 135
Level float control....Sept. 179
Lift truck with scoop finds many uses Oct. 150
Lighting improvements in your knitting mill. Mauldin & Reed (F)....Apr. 109
Low-water cutoff protects electric stills Sept. 178
Load-elongation recorded by new device. H. C. Brown (F)....June 123
Loom drives changed to utilize multiple V-belts. W. L. Fluke (F)....May 148
Machine guards made from pipe....Dec. 154
Magnetic starter ....Aug. 136
Materials-handling in the storehouse Jan. 128
Materials handling is vital in all departments (F) ....May 97
Mechanical handling of loom beams at Nashua. Benjamin Thomas, Jr. (F) Sept. 167
Mercury switch cures contact troubles Apr. 160
Metal-spraying gun ....Sept. 178
Mills are getting more equipment. E. D. Fowle (F) ....Feb. 106
Modernization of American Yarn & Processing Co. C. M. Bowden (F)...Dec. 106
Oilless bearings aid machine maintenance. C. M. Bowden (F)....Sept. 159
Overbelting increases life of V-belts Sept. 186
Panel mount makes rotameter convenient Sept. 178
Pendulum-type testing machine uses electronic control. R. J. De Martini (F) Mar. 115
Pump impels liquids at 60 to 480 gal per min. ....Nov. 159
Rack for water race....Dec. 142
Rotor is aid to reading rotameter...Oct. 140

(F) indicates feature article (ed) editorials

War

Textiles for military purposes—Army and Navy extend their joint textile buying (F) .....Oct. 125
Army needs more wool top. H. S. Knowlton (F) .....May 104
Army textiles are unsuitable, say QM officers. Gladys Montgomery (F).. Nov. 155
Fourth-quarter military needs...Sept. 116
Long-distance visibility from fabrics with daytime glow. J. M. Johnston (F) .....May 110
Melton manufacture for Army. Fred Sykes (F) .....Feb. 159
Netting used by the Army finished with cellulose derivatives. Capt. J. E. Goodavage (F).....May 139
No coasting for textiles on the road to V-J day! Gladys Montgomery (F) June 91
9-oz. sateen is urgently needed by the Army (F) .....Feb. 129
Urgent war needs again get right of way. Gladys Montgomery (F).Feb. 107

Washington

Ceilings and manpower problem considered jointly. Gladys Montgomery (F) .....July 131
New freight rates have little textile effect now. Gladys Montgomery (F) June 149
No coasting for textiles on the road to V-J day! Gladys Montgomery (F).. June 91
Raw-cotton problem thrashed out in Washington. Gladys Montgomery (F) Jan. 111
Surplus textile release bogs down at critical time. Gladys Montgomery (F) Dec. 137
U. S. Dept. of Agriculture aids program for in-plant feeding. Gladys Montgomery (F) .....Aug. 133
U. S. Textile Committees abroad on government missions. Gladys Montgomery (F) .....May 141
Urgent war needs again get right of way. Gladys Montgomery (F)...Feb. 107
WPB channels goods to low-price products (F) .....Mar. 131
WPB explains need for M-388. Gladys Montgomery (F) .....Apr. 149

Wool Manufacturing

Abrasion testing machine.....June 152
Agencies strive to drop 1945 garment prices to 1943 level. Gladys Montgomery (F) .....Feb. 109
Argentina has an active textile industry. M. T. Meadows (F).....Jan. 69
Army and Navy extend their joint textile buying (F).....Oct. 125
Army melton manufacture. Fred Sykes (F) .....Feb. 159
Army needs more wool top. H. S. Knowlton (F) .....May 104
Army textiles are unsuitable, say QM officers. Gladys Montgomery (F).... Nov. 155
Bad work container.....Feb. 178
Bales opened with leverage tool..Sept. 186
Blankets, bowing, caused by handling.. Nov. 194
Blankets show streaks.....Feb. 204
Blankets, streaky .....Apr. 188
Blanket warmth is effected by construction, fiber, finish. F. T. Mosedale (F) Jan. 97
British government moves to control textile industry. A. W. Williams (F) Nov. 149
Canadian mill man corrects weaving defects .....Oct. 166
Carding cotton on woolen system..May 172
Change in stud permits use of longer brake band .....June 164
Cloth expander, ball-bearing.....Apr. 152
Cloth truck floor replaced by rails..Nov. 172
Continuous processing in woolen mills. Gustav Zellnik (F).....Aug. 119
Copper man used for tests on heated clothing (F) .....Feb. 157
Correct depreciation rates will help post-war success. Fred Merish (F)..July 121
Cotton and wool knitting yarn costs. P. M. Thomas (F).....Nov. 108
Defects in woolen fabrics. Fred Sykes (F) .....Jan. 115
Dermatitis from wool.....Mar. 164
Determining yardage for full loom beams. George Wakefield (F)..Oct. 129
Direction of unwinding modifies twist.. Dec. 154
Dobby-jack lifter aids girl weavers... Aug. 144

(F) indicates feature article (ed) editorials

Doffer's load lightened by bobbin lifter (F) ....Oct. 143
Doubler-twister ....Aug. 135
Dropped-harness defects prevented by attachment ....Jan. 132
Drying controlled by detector....Nov. 160
Electric straingage promises solution to textile machine problems. V. E. Hillman (F) ....Oct. 104
Electronics at work for textiles. H. E. Reed (F) ....July 83
Empty cone used to line yarn with guide Dec. 152
Emulsion mixing tank. Lucien Brunette ....May 150
Extra warp ends wound on take-up spools ....Dec. 152
Extractor doubles drying-production... Oct. 145
Felt oil guard used on spinning mule.. Dec. 150
Fiber regain data simplified. C. H. Reumann (F) ....June 101
Formulas given for estimating yarn strength ....Dec. 164
Frame stops loom when harness breaks May 150
Frame used for painting bobbins...July 146
Gage for setting bat-wing type shoe.. Mar. 144
Gage tests trueness of loom-beam gudgeons ....Feb. 178
German textiles relied heavily on synthetics (F) ....Oct. 139
Granite and crepe weave designs. George Wakefield (F) ....Apr. 116
Guards protect ends from oil drippings Mar. 146
Harness adjustment for entering frame May 154
Harness tool to replace eyes on loom... Mar. 146
Hook used for holding bell weight.June 164
Industry plans to renovate, modernize and expand. H. E. Reed (F)....Nov. 103
Labor-Management Committee unifies wool combing plant. H. S. Knowlton (F) ....Aug. 96
Leather strap keeps box pins in place.. June 160
Lint-free warp stop motion....Mar. 133
Load-elongation recorded by new device. H. C. Brown (F)....June 123
Loom binder tool....Nov. 166
Loom, bobbinless shuttle....Oct. 148
Loom drives changed to utilize multiple v-belts. W. L. Fluke (F)....May 148
Loomfixers' manual. E. P. Schremp (F) Apr. 212
Loomfixer's tools—weapons of production (F)....Jan. 74; Feb. 122; June 110
Loom magazine tools make adjustments easy ....June 158
Loose shuttle clips packed with paper.. Mar. 144
Magnifier set, portable....Apr. 206
Materials handling is vital in all departments. H. E. Reed (F)....May 97
Mechanical properties of wool felt are controllable. W. H. Lehmberg (F).. Mar. 90
Microscope—increasingly useful. C. W. Bendigo (F) ....July 97
Mills should know their indirect costs.. Sept. 196
Moisture detector ....Feb. 170
Nashua program aids returning veterans. Swallow, Barnes & Willard (F) July 102
New chemical aids wool scouring. A. H. Razee (F)....Sept. 155
New conceptions change many textile technics. C. W. Bendigo (F)....Feb. 110
New equipment development continues. H. E. Reed (F)....Feb. 111
New lubricants aid wool processing. W. P. Heintz (F)....July 101
No coasting for textiles on the road to V-J day! Gladys Montgomery (F).. June 91
100 years of chain control for loom box motions. C. W. Bendigo (F)....Aug. 87
Overcoating inadequately scoured..Jan. 154
Oxidation in wool fabrics....Mar. 168
Personnel set-up for woolen card room. Gustave Zellnik (F)....Dec. 110
Picker rod bushing compensates for wear Apr. 162
Piece-up spool for breakouts....Mar. 142
Precision winding depends on wind, lay and gain. R. C. Pillsbury (F)..May 137
Predetermining fabric strength....June 182
Production board controls 200 botany yarn items (F)....June 127
Quiller performance improved by removing tip ....Feb. 176
Rasp cuts groove in shuttles....Feb. 182
Rawhide prevents wear on binder parts June 162
Reconversion technical problems not severe (F) ....June 95
Resin-bonded picker sticks....Mar. 133
Revolving spinning ring....Jan. 142
Revolving spinning ring alters resistance factors ....Mar. 158
Roller selvage beams insure uniform tension ....Jan. 134
Rugs—fast colors for rugs. L. L. Walmsley (F) ....Nov. 111
Running rayon on the woolen system. Drennen & Boswell (F)....Dec. 100
Salvaging patterns can reduce entering costs. H. E. Wenrich (F)....June 141
Sapphire guides for textile machinery. May 144
Scale with wide range....Feb. 170
Scouring aided by sodium tetraphosphate ....Oct. 120
Semi-decating machine ....July 136
Sloughed-off filling aided by firm bobbin Dec. 146
Sludge removal by scouring....Feb. 170
Soaking doubles life of woolen slasher blankets ....Jan. 152
Specialized dryers replace older equipment. C. N. Rabold (F)....Feb. 113
Spindles can be oiled without oil overflow ....June 156
Spools for heavy duty have plastic ends Oct. 146
Sportswear finishing ....Sept. 214
Stockroom control should pay for itself. Gunther & Gross (F)....Apr. 143
Strap assists lifting loom let-off lever.. May 154
Strap fastening for picker stick....Oct. 158
Struggle for production could not conquer handicaps. W. B. Dall (F).... Feb. 103
Sulzer loom ....Nov. 160
Surplus textile release bogs down at critical time. Gladys Montgomery (F) Dec. 137
Tachometer, hand ....Mar. 133
Tension and density control....Dec. 141
Termination routine on war contracts (F) ....June 99
Tramp iron removed by air-duct magnet Sept. 177
Tray prevents dirt from falling on warp Apr. 164
Two truss rods steady lay and reed. F. A. Kidd ....Mar. 140
Wage fixing by Congress opposed by A.C.M.A. (F) ....Nov. 137
WPB channels goods to low-price products (F) ....Mar. 131
WPB explains need for M-388. Gladys Montgomery (F) ....Apr. 149
Weave rooms need specialized supervision ....Oct. 164
Weave-room seconds controlled by systematic check-ups. H. I. Jackson (F) Dec. 102
Weaving defects caused by idle harness sheaves ....July 140
Whiproll gage makes adjustments accurate ....July 140
Wider wool cards answer problems (F) Nov. 115
Wool yield ....Feb. 200
Woolen-card production upped by tape condensers ....Dec. 172
Worsted knit cloth needs dimensional stability (F) ....Sept. 165
Worsted spinning mill employees handbook. F. E. Cleyn (F)....June 104
Worsted-yarn defects traced by movies. F. E. Cleyn (F)....Sept. 171

Authors' Index

A

Allen, F. B. Carbon dioxide is suitable agent to fight textile fires....Dec. 104
Alling, S. F. De-ionized water reduces variables; cuts costs....Mar. 121
Ariente, P. J. Steam processing scours cotton continuously ....July 94
Ashmore, William G. Textiles bring high prices in Mediterranean countries.... Dec. 119

B

Ball, H. J. & E. H. Helliwell. Cotton combing becomes prerequisite of quality yarns ....May 112
Cotton combing quality not consistent with cost ....June 129
Barnes, Cecil, G. W. Swallow & Anne Willard. Nashua induction program aids returning veterans....July 102
Bendigo, C. W. Intra-industry competition ....Nov. 4
Labor-management organization ...Oct. 4
The microscope—increasingly useful for textile work ....July 97
New conceptions change many textile technics ....Feb. 110
100 years of chain control for loom box motions ....Aug. 87
Research activity continues unabated.. Feb. 115
Standards manual minimizes training time ....Mar. 87
Textile evolution remains orderly..Sept. 4
Too many samples—why?....Dec. 4
Bentley, E. Oil from drip pan absorbed by felt ....Dec. 148
Thimbles assist in covering rolls..Feb. 176
Bergfeld, H. B. Bemis L-M gets results.. Apr. 220
Blake, J. J. & A. N. Sheldon. Interrelation of ring, bobbin and spindle speed studied ....Jan. 107
Borton, Richard A. Synthetic resins enhance today's book-bindings....Aug. 104
Boswell, T. A. & J. T. Drennen. Running rayon on the woolen system....Dec. 100
Bowden, G. Mallard. Carded yarn mills improved drawing, pt. 3....Sept. 161
Chadbourn Hosiery Mills convert to nylon ....Oct. 113
Cramerton announces automatic comber July 96
Carter, Seth. Waste control saves card-room dollars ....Sept. 147
Chase, Winn W. Plastics provide bond for applying pigment colors....Mar. 98
Cleaveland, John B. Machines and technics vary with plastic coatings..June 117
Cleyn, F. E. Movies employed to trace worsted-yarn defects ....Sept. 171
Operator instruction covers worsted spinning mill ....June 104
Cobb, C. K. Mill devises test for humidifier head ....Nov. 166
Crumley, J. A. Five M's influence hosiery production ....Dec. 135

C

Dall, William B. Cotton Exchange marks 75 years of service....July 91
1945 believed centennial of American circular knitting ....Apr. 104
Ramie—tantalized textile men for one hundred years ....Dec. 93
Struggle for production could not conquer handicaps ....Feb. 103
De Martini, R. J. Constant-load tests achieved electronically ....Mar. 115
Seam detector uses electronic relay.... Oct. 135
Dodson, Raymond. Spun-rayon warps more difficult on silk system....Aug. 129
Dreby, Dr. Edwin C. Latent throwing defects show up in hosiery....Jan. 88
Drennen, J. T. & T. S. Boswell. Running rayon on the woolen system....Dec. 100
Dubeau, A. L. & F. A. Huntress. Bicarbonate process used for caustic removal ....Feb. 153
Dunlap, George H. & E. B. Groves. Tests show increased card speeds practical July 100
